Who We Are

Klarity Medical Products manufactures and distributes a wide range of products serving the needs of radiation therapists, occupational therapists, hand therapists, and other medical specialists. With facilities in the USA, China, and Europe, Klarity is a world leader in manufacturing and developing thermoplastics and positioning devices. All items are produced with strict ISO 13485 certification and in compliance with all FDA, CE, and other international regulations.

Our History

Our technical expertise dates back to the 1960's, when Dr. Lester M. Larson served as a research chemist at the Dupont Company in Wilmington, Delaware. While there, he created the world's first thermoplastic splints in collaboration with Occupational Therapist Dorothy Kester, O.T.R. His work provided the foundation for all of today's low-temperature thermoplastic splinting materials.

Dr. Larson and his son, Peter Larson, founded Larson Medical Products in Columbus, Ohio in 1989, and in 2000 a collaboration began with Dr. Deren Zhan of Guangzhou, China. This brought new manufacturing capacity and the expanded product lines you see in this catalog.

Today, the name Klarity® symbolizes our dedication to technological advancement and excellence. We are committed to serving the world with the highest quality medical thermoplastics and positioning devices, always seeking to improve patient care.

hello@klaritymedical.com

For years, Klarity has been a global leader in the field, with a primary focus on therapists and patients. Our state-of-the-art designs are revolutionizing the way therapists do their jobs. Our products also provide safer, more precise, and more comfortable options for patient positioning. At every turn, we at Klarity work hard to ensure a higher standard of care. Always improving. Always better.

Innovating for you

Klarity's heart and soul lies in innovation. At a time when water baths offered the only way to heat thermoplastic immobilization devices, we envisioned a new method: dry heat. Klarity pioneered the design and manufacture of dry-heat ovens for the preparation of thermoplastics, and in the process we helped optimize therapist workflow and minimize patient risk of bacterial infection. Likewise, our Klarity Cushions™ have transformed patient positioning. By creating a warm, dry, and easily moldable neck cushion with even density, we've made life much easier for therapists and much more comfortable—even calming—for patients. These products demonstrate Klarity's commitment to thinking outside the box.

Responding to your needs

When changes come, as they inevitably do, Klarity is quick to respond. We pride ourselves on being nimble, quickly adapting to the latest developments in the field of radiation therapy. We also respond to individual therapists' needs by manufacturing custom products. Klarity works with clinics of any size to develop customized product designs.

Making good products great

We at Klarity love to take good products and make them better. We've improved our masks at every turn, creating a range of the highest-quality thermoplastics. Beyond our standard Klarity White™, we developed Klarity Green® thermoplastic materials, which have an improved working time, and we've also created Klarity Blue™, an ultra-strong mask with the least amount of shrinkage. We also designed our vacuum bags with more durable material, so they are easier to clean and don't have to be replaced nearly as often. Finally, with our baseplates, we've increased the indexing potential without making things more complicated for therapists. Small, simple changes can make a world of difference.

Upholding the highest standards

We design all of our products in accordance with the most up-to-date science on record. We also certify that our products adhere to all national and international compliance standards. But we never stop there. At Klarity, we hold ourselves and our products to the highest standard: our own. We don't sell products that we don't like. Period. If a preliminary product design doesn't suit the complex needs of today's radiation therapists, or if it doesn't pass muster with patients, we make adjustments until both therapists and patients are happy. We only settle for the best we can offer. And that's our promise to you.

Klarity: Better Products for Better Care.

Klarity Optek™ System

Optimal stability for the head, neck, and shoulders

- Enhanced indexing
- Comfortable shoulder retraction
- Strong and durable

Klarity Optek™ System R630-3SCF

The Klarity Optek™ System is a comfortable and adaptable S-type Overlay for head and neck treatments. The Carbon Fiber construction has enhanced strength and durability. The system is ideal for IMRT and conformal treatments in a 360° arc and is dual-configured for adult and pediatric treatments. The lower portion gently tapers for patient comfort and the overlay is equipped with additional indexing around the edges. The Optek System is extremely lightweight and CT-compatible with excellent attenuation factors. Comfortable and adjustable hand grips assist with shoulder retraction. The Optek System is compatible with all S-type masks.

105cm (Length) x 61cm (Width)

INCLUDED COMPONENTS:

**Overlay
Handgrips**

Enhanced indexing

Easily adjustable handgrips

Optek™ Demi-Baseplate

The Klarity Optek Demi-Baseplate for the Elekta HexaPOD™ System.

Klarity Optek™ Demi-Baseplate R630-SHCF

The Optek Demi-Baseplate is specially designed for the Elekta HexaPOD™ evo RT System, and is equally useful for situations requiring S-type masks with a shortened baseplate. It is extremely lightweight and the lower portion gently tapers for patient comfort. The Optek Demi-Baseplate is dual-configured for pediatric and adult S-type masks and is compatible with all S-Type masks.

58cm (Length) x 61cm (Width)

Also available as **R630-OHCF**
O-type/U-frame Demi-Baseplate for the Elekta HexaPOD™ evo RT System, compatible with all O-type and U-frame Masks.

COMPATIBLE WITH:

S-type Head Masks

S-type H&S Masks

Indexing Bars

Head Supports

Klarity Cushions™

Vacuum Bags

SRS Adaptor for S-type Baseplates

- Compatible with standard S-type Baseplates
- Easy to attach and detach.
- Compatible with Klarity SRS Masks and the Simple Shim System™

Klarity SRS Adaptor for S-type Baseplates

S-20A Compatible with standard S-type baseplates from Klarity and others

S-20B Compatible with Civco S-type baseplates

The Klarity SRS Adaptor is a simple attachment that fits on top of your existing S-type baseplate. The SRS Adaptor clicks into standard S-type mask holes just like a mask. With the Adaptor in place, both bottom and top SRS masks can be easily and securely attached. Mask height can be adjusted between 0-4mm at each pin location using our Simple Shim System™.

Our SRS Adaptor is ideal for clinics that want highest precision SRS treatment but without the price tag and complexity of a complete baseplate system. The Klarity SRS Adaptor is compatible with all standard S-type baseplates and standard Silverman head supports. The Klarity SRS Adaptor is compatible with Klarity SRS Masks.

COMPATIBLE WITH:

Optek Overlay

Klarity SRS Masks

Head Supports

MultiFix™ Head-Only Baseplate

An easy and flexible solution for head placement

Head Only MultiFix™
R605-HCF

35.5cm (Length) x 25.5cm (Width)

The Klarity MultiFix™ Head Only Baseplate is a lightweight and simple positioning solution for head placement. Made of strong and durable carbon fiber, the Head Only MultiFix is fully indexable, and compatible with both U-Frame and O-Type head masks. The baseplates can be used with standard Silverman headrests, and options are available for prone positioning. Heat-activated Klarity Cushions™ provide neck support and additional accessories are available, such as vacuum bags, carbon fiber and Silverman head rests, and indexing bars.

Prone Head MultiFix™
R605-HPCF

The baseplate is compatible with the R605-HCF Head Only MultiFix, which can be used with U-frame and O-type Head Masks.

35.8cm (Length) x 25.7cm (Width)

COMPATIBLE WITH:

U-frame Masks

O-type Masks

Klarity Cushions™

Indexing Bars

Head Supports

Duo Align™ Full Body System

An all-in-one baseplate for O-type and U-frame masks compatible with small-bore machines

Duo Align™ Full Body System R605-12FCF

The Klarity Duo Align Full Body System is a lightweight and simple positioning solution for head, shoulder, and full body placement. Made of strong and durable Carbon Fiber, the Duo Align Baseplate is fully indexable, and compatible with both U-frame and O-type head masks as well as pelvic masks. The increased compositional consistency allows for superior attenuation factors. The baseplate can be used with standard Silverman headrests, and is compatible with the R605-WCF Overhead Arm Positioner for additional arm placement options. It is also compatible with the Leg Positioner Cushions, and it comes with an optional Groin Lock for pelvic mask fixation. A narrow profile is compatible with small bore machines.

133cm (Length) x 54cm (Width)

INCLUDED COMPONENT:

Groin Lock

The Groin Lock connects directly to the Duo Align Baseplate and makes Pelvic mask fixation more secure. It is optional and can easily be connected/removed.

Included with the Duo Align System

OPTIONAL COMPONENTS:

Leg Positioner Cushions R612-L

The Klarity Leg Positioner Cushions are comfortable foam cushions for ergonomic and adjustable knee and leg support. The cushions have a movable range of 0-46cm and can easily be locked or unlocked to the Duo Align Baseplate. It comes with an acrylic baseplate, a KneeFix Cushion, and two Elevation cushions.

Supplemental item

Overhead Arm Positioner R605-WCF

The Klarity Overhead Arm Support easily and securely connects to the Duo Align Baseplate. It allows for comfortable arm support to improve positioning accuracy and reproducibility. The height of the arm supports is adjustable in six angles between 20-46° and they have a rotating arc of 0-170°. The height of the Wrist Cups is adjustable between 18.5-25.4cm.

Supplemental item

COMPATIBLE WITH:

U-frame Masks

O-type Masks

Klarity Cushions™

Indexing Bars

Head Supports

Supine Breast System

A lightweight yet durable system engineered for a quick and fully adjustable setup

- Minimal attenuation
- Lightweight and durable
- Adjustable arm supports
- Engineered for quick setup

Klarity Supine Breast System R611-5SDCF

The Klarity Supine Breast System is a complete system for supine breast and torso positioning. The Klarity Supine Breast System comes as a complete system and includes two arms cups, two wrist cups, two hand posts, a removable head cup, adjustable bottom-stopper, and a leg cushion. The system is made of strong, lightweight Carbon Fiber and is CT compatible. Fiducial markers allow for easy tracking of the spine in relation to the baseplate. The Klarity Supine Breast System is compatible with the WingSpan™ Baseplate.

131cm (Length) x 41cm (Width)
Maximum Height is 58.2cm at 25°

INCLUDED COMPONENTS:

**Supine Breast System
Leg Cushion**

COMPATIBLE WITH:

WingSpan™ Baseplate

- Secure arm support
- Lightweight and easily transportable
- Low attenuation

Klarity WingSpan Baseplate R632-BTCF

The Klarity WingSpan Baseplate features secure arm support for upper body treatment and diagnostic procedures. The WingSpan Baseplate comes with T-Hand Grips. It can be used with standard Silverman head supports. The compatible WingSpan Vacuum Bag allows for secure customizable support. It is comfortable and lightweight, and allows for easy transporting, indexing, and re-positioning, with low attenuation. Optional Handgrip Extenders are also available for more positioning options. The Klarity WingSpan Baseplate can be used alone, or in conjunction with the Klarity Supine Breast System. It is also compatible with the Klarity SBRT System.

56.1cm (Length) x 58cm (Width)
Also available as MR Compatible

OPTIONAL COMPONENT:

Handgrip Extenders RNH-632

Klarity offers extension handgrips for the Klarity WingSpan™ Baseplate. These rubber grip handles screw into the ends of the existing T-bar for a quick and easy adjustment. They offer an additional level of adaptability for more comfortable arm positioning. Sold as a pair

COMPATIBLE WITH:

Klarity Leg Positioner

Easy, ergonomic leg positioning with precise shoulder suppression

Klarity Leg Positioner R634-LCF

The Klarity Leg Positioner is a complete set that includes baseplate, leg support, two elevation blocks, foot cushion, and hand grips. Sturdy foam cushions reduce patient fatigue, and the angle of the feet is fully indexable and adjustable. The acrylic hand grips are a comfortable option for shoulder suppression, and the ball and socket locking feature allows for reproducible tension in 5cm increments. Two elevation blocks are included for height adjustment. The system indexes to any couch top, and can be combined with other immobilization systems for compatible positioning. The Leg Positioner comes as a full system, and the Knee Cushion and elevation blocks can also be indexed directly to the couch top for additional positioning options.

86.4cm (Length) x 44.5cm (Width) x 26.7cm (Max Height)
Elevation wedges at 10/20/30
Also available as MR Compatible

- Indexable Carbon Fiber baseplate
- Comfortable and natural leg positioning
- Reproducible shoulder suppression

INCLUDED COMPONENTS:

Baseplate & Handgrips

Knee Cushion

Foot Holder

Elevation Blocks

COMPATIBLE WITH:

Indexing Bars

Klarity PelvicFix™ Baseplate

PelvicFix™ Baseplate
R606-ACF

The Klarity PelvicFix Baseplate: for easy, reproducible pelvic positioning

The Klarity PelvicFix Baseplate is a supine pelvic belly board that can be used with large, single thermoplastic sheets for immobilization of the entire abdominal and pelvic region. The baseplate includes a center cutout for easy treatment and an optional indexable thigh spacer. PelvicFix thermoplastic sheets attach to the sides and groin for indexable setup and can be adjusted to fit each patient. The baseplate can also be indexed to the treatment couch.

Adjustable to patient size

INCLUDED COMPONENTS:

Baseplate

Thigh spacer R606-B-1

Indexable Thigh Spacer for PelvicFix Baseplate

COMPATIBLE WITH:

Indexing Bars

PelvicFix Masks

Vacuum Bags

Klarity[®] SBRT System

The Klarity SBRT System is simple to use, highly indexable, and easily adjustable.

Klarity SBRT System R62400-3CF

The SBRT System includes the Carbon Fiber Baseplate, the Klarity WingSpan™ Baseplate with accompanying WingSpan™ vacuum bag, an adjustable belly bridge with compression paddle, respiratory belt, an adjustable knee bridge with vacuum bag, and a movable foot positioner. The system also comes with two indexing bars, and it is compatible with standard thorax masks and Silverman headrests.

The Carbon Fiber Baseplate is lightweight and durable, with handgrip holes on either side for easier placement and hanging options. The SBRT Baseplate indexes to the couch top in two places, and scalloped edges allow the belly and knee bridge to be indexed in the best position for the patient. The height of the belly and knee bridges can be adjusted quickly, and the bridges lock and unlock without fuss. The SBRT System is also equipped with an ergonomic belly compression paddle and a respiratory belt designed to maximize patient comfort while providing necessary immobilization.

Klarity

MR SBRT System

A complete, easily adjustable immobilization system with multiple options for abdominal fixation

**Klarity MR SBRT System
R62400-3GF**

The new Klarity MR SBRT System is simple to use, highly indexable, and easily adjustable.

The standard MR SBRT System includes a baseplate, the Klarity MR WingSpan™ Baseplate, an adjustable belly bridge with a compression paddle, respiratory belt, an adjustable knee bridge, and a movable foot positioner.

The system also comes with two indexing bars, and it is compatible with standard thorax masks and Silverman headrests.

The baseplate is lightweight and has handgrip holes on either side for easier placement and hanging options. The MR SBRT Baseplate indexes to the couch top in two places, and scalloped edges allow the belly and knee bridge to be fixed in the best position for the patient. The height of the belly and knee bridges can be adjusted quickly, and the bridges lock and unlock without fuss. The MR SBRT System is also equipped with an ergonomic belly compression paddle and an optional respiratory best designed to maximize patient comfort while providing necessary immobilization.

220cm (Length) x 53cm (Width)

Elevation wedges at 10/20/30
Also available as CT Compatible

INCLUDED COMPONENTS:

MRI Medibord™ Overlay

for Siemens Magnetom Skyra and Aera

**MRI Medibord Overlay
for Siemens Magnetom Skyra and Aera**

KSSMR-01 Overlay
KME-SSME-AC Torso Coil Holder
KME-SSME-IB Indexing Bar
172.6cm length x 53cm width x 2cm thickness

The MRi Medibord Overlay for Siemens Magnetom Skyra and Aera provides a clean and flat surface for accurate patient positioning. Image fusion with CT images can be undertaken very quickly as table curvature is eliminated, enabling optimum repeatability between imaging and treatment.

The Overlay covers the entire cushioned patient area and is raised 10mm above the top level of the rails. Bright colored spacers locate the overlay perfectly parallel to the table. The width matches most linear accelerator systems, providing broad compatibility.

It's low weight of less than 11lbs and its high resilience make the overlay highly suitable for busy MRI rooms. The head end has a cutout to fit around the head coil unit. It also provides semi-circular recessed indexing points for standard indexing bars and other positioning accessories.

The overlay is extremely rigid with low attenuation.

- 172.6cm length x 53cm width x 2cm thickness
- Compatible with most couch tops
- Full table size with cutout for head coil
- MRi safe, RF compatible, and nonconductive.

MRI Medibord™ Overlay

for Siemens Magnetom Espree and Excite 1.5T

MRI Medibord Overlay for Siemens Magnetom Espree and Excite 1.5T

KME-SSMR-02 Overlay

KME-SSMR-AC2 Torso Coil Holder

KME-SSMR-IB2 Indexing Bar

166.5cm length x 50.9cm width x 2cm thickness

The MRI Medibord for Siemens Magnetom Espree and Excite provides a clean and flat surface for accurate patient positioning, enabling optimum repeatability between imaging and treatment. Image fusion with CT images can be undertaken very quickly as table curvature is eliminated.

The overlay is placed directly on the rail surface after removing cushions from around the main coil, optimizing bore space. The board is accurately located and locked with oblong sliding pins in each corner. The width is slightly larger than the normal patient area but leaves the t-rails accessible for accessories.

It's low weight of less than 11lbs and its high resilience make the overlay highly suitable for busy MRI rooms. The head end has a cutout to fit around the head coil unit. It also provides semi-circular recessed indexing points for standard indexing bars and other positioning accessories.

The overlay has low attenuation and is extremely rigid.

- 166.5cm length x 50.9cm width x 2cm thickness
- Interlocks onto existing table with 4 oblong pins
- Works with main coils under board
- T-rail remains fully accessible
- MRi Safe, RF compatible, and nonconductive

MRI Medibord™ Overlay

for GE Signa Voyager And Pioneer

MRI Medibord Overlay for GE Signa Voyager And Pioneer

KME-GEKU-W1 Overlay

KME-GEKU-AC Coil Holder

KME-GEKU-IB Indexing Bar

82cm main length / 52cm support length x 39cm width x 2cm thickness

The MRI Medibord Overlay for GE Signa Voyager and Pioneer enables optimum repeatability between imaging and treatment. The flat registration of the patient's position eliminates table curvature and provides a position equivalent to that of a Linac treatment system. Images are taken in the same position as on CT scanner, providing fast and accurate image fusion.

The overlay is located on the top of the existing table and locks over the edge with supports that follow the curvature of the table. This solution is designed so that the torso coil fits under the main infill board and the support board can be located on either side of the main board. The main boards has standard indexing and locks onto the existing table with no interference with the mail coils.

It is extremely rigid with low attenuation.

- 82cm main length / 52cm support length x 39cm width x 2cm thickness
- 2 part overlay set
- Compatible with positioning accessories
- MRi Safe, RT Compatible, and nonconductive

MRI Medibord™ Overlay

for Siemens Magnetom Vida

MRI Medibord Overlay for Siemens Magnetom Vida

KME-SVMR-WI Overlay
KME-SVMR-AC Coil Holder
KME-SVMR-IB Indexing Bar
 202.8cm length x 52cm width x 2cm thickness

The MRI Medibord for Siemens Magnetom Vida provides a clean and flat surface for accurate patient positioning to enable optimum repeatability between imaging and treatment. Image fusion with CT images can happen more quickly as table curvature is eliminated.

The overlay fits on the couch top and is narrow enough for free use of the rails on the side of the couch while maintaining standard indexing dimensions. A low weight of under 5 kg and high resilience make the overlay highly suitable for busy MRI rooms.

The head end has a cut-out to fit around the head coil unit. It is compatible with standard indexing bars and other positioning devices. It can be indexed to any existing table, and features an integrated locator block. It is full table sized, with a cutout for the head coil. A coil holder for Body Coil 16 is available in various sizes.

It has low attenuation and is highly rigid.

- 202.8cm length x 52cm width x 2cm thickness
- MRi Safe
- RF Compatible
- Nonconductive

MRI Medibord™ Overlay

for Philips Achieva

MRI Medibord Overlay for Philips Achieva

KME-PHAC-WI Overlay
KME-PHAC-AC Coil Holder
KME-PHAC-IB Indexing Bar
 236cm length x 50.3cm width x 2cm thickness

Klarity offers the Medibord MRI Overlay for Philips Achieva systems.

The Overlay provides a clean and flat surface for accurate patient positioning and indexability to enable optimum repeatability between imaging and treatment. The overlay covers the entire patient area and is raised 25mm above the top level of the rails to create clearance for the coil cables. Fixed spacers locate the overlay perfectly to the table. The scanning zone has a reduced width to allow for the coil to be wrapped around patient and overlay.

It's low weight of less than 11lbs and its high resilience make this overlay highly suitable for rapid changeovers during interdepartmental use of the MRI system. The overlay can be removed within minutes, minimizing downtime.

The Medibord Overlay for Philips Achieva is designed to work with indexing bars as well as other positioning systems and tools. The coil holder is suitable for the TorsoXL coil and uses the full space of the 60cm bore to allow optimal use of space.

The Overlay has low attenuation and is extremely rigid with support beams for increased stability.

- 236cm length x 50.3cm width x 2cm thickness
- Compatible with all couch tops
- Raised to fit main coils
- MRi Safe, RF Compatible and Nonconductive

MRI Medibord™ Overlay

For Philips Ingenua

MRI Medibord Overlay for Philips Ingenua

KME-PHIN-WI Overlay

KME-PHIN-AC Coil Holder

KME-PHIN-IB Indexing Bar

200cm length x 50.3cm width x 2cm thickness

Klarity offers the MRI Medibord™ Overlay for Philips Ingenua System. Solutions for 60cm and 70cm bore are available.

The Overlay is the ideal solution for flat patient positioning on a Philips Ingenua MRI with 70cm bore. It provides a clean and flat surface for accurate patient positioning and indexation to enable optimum repeatability between imaging and treatment. The Overlay covers the entire patient area. It is flush on the top level of the rail without clearance to allow maximum bore usage.

It's low weight of less than 11lbs and its high resilience make it highly suitable for rapid changeovers during interdepartmental use of the MRI system. The overlay can be removed within minutes, minimizing downtime.

The Overlay is designed to work with indexing bars as well as other positioning systems and tools. A coil holder is available for the TorsoXL anterior coil. Wing mounts are also available for head and neck masks as well as indexing bars.

It is extremely rigid with low attenuation.

- 210.7cm length x 53cm width x 2cm thickness
- Compatible with all couch tops
- MRi Safe
- RF Compatible
- Nonconductive

MRI Medibord™ Overlay

For Siemens Biograph MMR

PET-MRI Medibord Overlay for Siemens Biograph MMR

KME-SBMR-WI Overlay

KME-SBMR-HN Head & Neck Coil Holder

KME-SBMR-AB Standard Torso Coil Holder

KME-SBMR-ABS Small Torso Coil Holder

KME-SBMR-ABL Large Torso Coil Holder

KME-SBMR-ABX Extra Large Torso Coil Holder

KME-SBMR-IB Indexing Bar

200 cm length x 50.3 cm width x 2cm thickness

Klarity offers the PET-MRI Medibord™ Overlay for the Siemens Biograph mMR System. The Overlay provides a clean, flat surface for accurate and easily reproducible patient positioning. The overlay covers the entire patient area and is raised 10 mm above the rails to create clearance for the main coil. Brightly colored spacers locate the overlay perfectly parallel to the couch.

Its lightweight construction (> 5 kg) and high resilience make the Overlay suitable for interdepartmental use. The overlay can also be removed quickly, minimizing downtime during rapid changeovers.

The Overlay is designed to work with indexing bars as well as other positioning systems and tools. It is extremely rigid with low attenuation.

- 200 cm length x 50.3 cm width x 2cm thickness
- Compatible with all couch tops
- MRi Safe
- RF Compatible

U-frame Masks

Stereotactic Masks

O-type Masks

P-type Masks

E-type Masks

Proton Masks

V-type Masks

Breast & Pelvic Masks

Thermoplastic Masks

Klarity Thermoplastic Masks

To achieve the most successful treatment outcomes in radiation therapy, it is critical that radiation beams hit the tumor in the same place every time, targeting the affected area while sparing as many healthy cells as possible. Masks and other immobilization devices aid therapists in ensuring that patients return to the same position for every treatment.

Klarity offers four types of thermoplastic: Klarity White™, Klarity Green®, Klarity LiteGreen™, and Klarity Blue™. Each type of thermoplastic has been specifically designed for optimal fixation with each frame-type and is available in varying thicknesses, sizes, and perforation patterns. Our thermoplastic is stronger, less-sticky, and has less shrinkage than other thermoplastic masks.

Klarity Masks are easy to prepare and can be heated with either an oven (at 165°F/73°C) or a water bath (at 160°F/70°C). Heating times vary by product and heating method. When the thermoplastic mask material is thoroughly warm, it becomes pliable and is ready for molding on the patient. Once the thermoplastic cools, it becomes rigid and extremely strong.

Klarity White™

Available for S-type, U-frame, P-type, and Stereotactic masks

Klarity White™ is our original thermoplastic and continues to be the standard for much of the world today. Klarity White™ has a fast set-up for a strong thermoplastic mask. Klarity White™ is less sticky than other standard thermoplastics.

Strong
Standard Shrinkage

Molding Time:
45-60 seconds

Cooling Time:
8-10 minutes

Klarity LiteGreen™

Available for O-type and E-type masks

Klarity LiteGreen™ is our preferred thermoplastic for 3- and 5-point systems. It is non-stick, so the edges can be pulled apart if they touch, and it drapes nicely for an incredibly easy molding experience. Klarity LiteGreen™ is only available in 2.4mm with a microperforation pattern, which makes this mask stronger than other reinforced thermoplastic.

Stronger
Less Shrinkage

Molding Time:
1-2 minutes

Cooling Time:
8-10 minutes

Klarity Green®

Available for S-type, U-frame, O-type, P-type, V-type, E-type, Proton Therapy, and Stereotactic masks

Klarity Green® is our best selling, signature thermoplastic and is our recommended thermoplastic for most applications. It has less shrinkage and is completely non-stick, so edges can be pulled apart if they connect. Klarity Green® features a slightly longer working-time (30 extra seconds). This means therapists don't have to rush and can create a more carefully molded mask, which allows for a more comfortable patient experience.

Stronger
Much Less Shrinkage

Molding Time:
2-3 minutes

Cooling Time:

Klarity Blue™

Available for SRS, S-type, U-frame, and Proton Therapy masks

Klarity Blue™ is our strongest thermoplastic, and is ideal for high-precision applications. It also has the least amount of shrinkage. Our blue masks are the most rigid of any mask, with an extremely high resilience once molded and cooled. Klarity Blue™ also sets up quickly, making this ideal for patients who need limited immobilization time, and the blue material drapes gently for smooth, highly accurate mask making.

Klarity[®] SRS Masks

Compatible with the Qfix[®] Encompass[™] SRS Immobilization System

Don't get stuck with your SRS Mask!

Klarity SRS Masks offer an extra strong thermoplastic mask set with removable shims at each pin location to maximize treatment accuracy and patient comfort.

Klarity SRS Masks are specifically designed to help achieve precise treatment accuracy for Stereotactic Radiosurgery. The two-piece mask system allows for both anterior and posterior support, while providing a 0-4mm range of adjustment at each pin location. Our new Klarity Blue[™] thermoplastic creates a stronger, more rigid mask with increased stability for the most precise treatment setup.

Klarity's SRS masks come in Klarity Blue[™], our premiere thermoplastic. Klarity Blue[™] is extremely strong with the highest level of rigidity.

Klarity Blue[™] is our most comfortable, most advanced thermoplastic, and has the least amount of shrinkage. Super smooth molding creates a beautiful, form-fitting mask. Klarity Blue[™] has a comfortable working time, yet cures quickly in 4-6 minutes for efficiency.

Blue SRS Head Mask Set
Includes Posterior Mask,
Extended OpenFace Anterior Mask,
and Simple Shim System
3.2mm

Each mask set sold individually

Klarity[®] | SIMPLE SHIM SYSTEM[™]

Included with each Klarity SRS Mask

Klarity SRS Masks are an extra-strong thermoplastic mask set that works with the Klarity Simple Shim System[™].

The Simple Shim System[™] uses a familiar shimming concept to shim up or down in 1mm increments at each individual pin location. Shims can be added or removed to adjust the high between the posterior and anterior mask from 0mm (no shims) up to 4mm (4shims). The result is an intuitive shimming technique for secure, customizable treatment.

Smaller pin profile for less interference

OPTIONAL COMPONENT

R-QST-5

Single Shim System

We've created an even easier shimming option with our Single Shim System. Our 1mm shims can be placed on the rear mask to start (we recommend beginning with 2 shims so you can shim up or down between 0-4mm). The Single Shim creates an even height across all pin locations. Should you need to adjust the shim height at any individual pin location, you can swap out the single shim for individual shims instead (Simple Shim System[™]).

S-type Masks

Head

Klarity S-type Masks are available in Klarity White™, Klarity Green®, and Klarity Blue™, in both standard and reinforced perforation patterns.

The background features a large, abstract geometric shape on the left side, composed of several overlapping triangles and polygons in shades of green and blue. The right side of the page is a solid teal color. The text is positioned on the right side, aligned with the teal background.

Klarity Cushions™

Klarity Cushions™

Head & Shoulder Klarity Cushions™

Accessories

Klarity[®] Cushions[™]

Advanced indexing tools
for highly accurate,
customized support.

Klarity Cushions[™] are advanced indexing tools that provide secure, customized head and neck support for patients. These cushions have a working time of 5-7 minutes and are made from low-density thermoplastic-based materials that become soft and pliable when heated in an oven or water bath. After heating, Klarity Cushions[™] offer warm and comforting support that has a calming effect on most patients.

Once cool, Klarity Cushions[™] become firm and rigid, ensuring excellent reproducibility and precise placement for highly accurate treatment. Klarity Cushions[™] can be used with Silverman headrests, and they also fit under thermoplastic masks to create 360-degree custom support and immobilization. Klarity Cushions[™] with extra-fill in the neck can be used without a Silverman headrest, enabling optimal cervical spine support and immobilization.

The inner cushion contains a proprietary mix of high-quality, lightweight filling surrounded by a thin layer of thermoplastic. The soft and stretchable outer covering is made of simple nylon fabric. All Klarity Cushions[™] are 100% nontoxic, with minimal shrinkage and no odor. Klarity Cushions[™] are one-per-patient, but they can be reheated and reformed if needed.

- 100% nontoxic and odorless
- Can be reheated and reshaped
- Increased control of cervical spine area with low attenuation
- Comforting and calming for patients
- Preferred by therapists and clinics worldwide

Klarity[®] U-Cushion

A Universal Klarity Cushion[™]

The Klarity U-Cushion[™]
R550-U
23 x 30 cm

A small design innovation changes everything. Klarity's U-Cushion[™] provides all the benefits of the traditional Klarity Cushion[™] material in a design that is even easier to use. The curved top allows the therapist to contour the cushion to the patient with minimal adjustment. This eliminates the need to tuck away corners and enables the mask frame to come down evenly and securely. The U-Cushion[™] indexes to both the crown of the head and the Silverman headrest, reducing pitch and providing even greater precision.

R550-U2
23 x 30 cm

The R550-U2 has the same rounded top, but with extra fill in the neck. This allows the cushion to be indexed without a silverman. It can also be used to provide custom pitch, and works well with deeper head cups that require thicker cushioning under the neck.

R550-U3
23 x 35 cm

The R550-U3 Klarity Cushion[™] has the same rounded shape and easy moldability of our standard U-Cushion[™], but in a slightly larger size. The additional length of this Klarity Cushion[™] is excellent for deeper headrests or for customized positioning.

Best-selling standard size!

R550-M
20 x 25 cm

Our standard Klarity Cushion[™]. Designed to be used with a Silverman headrest, the R550-M cushion is our most popular size and is best suited for standard head and neck support.

R550-M1
23 x 30 cm

This Klarity Cushion[™] has a slightly wider base of support for greater support under the head and neck as well as improved indexing. The M1 works well on the Q headrest or a standard Silverman headrest.

R550-M2
20 x 25 cm
with double fill

The R550-M2 is the same shape and size as the R550-M standard Klarity Cushion[™], but with double the amount of filling for a more substantial cushion. .

R550-M3
23 x 35 cm

The M3 Klarity Cushion[™] is slightly wider and longer than other standard Klarity Cushions[™], making it ideal for use with deeper headrests. The M3 works well in situations requiring customized tilt and pitch of the head and neck.

R550-S
15 x 20 cm

A smaller version of the R550-M, this small cushion is appropriate for patients with smaller head sizes, including pediatric and adolescent patients.

R550-L
20 x 40 cm

The R550-L is a long, versatile Klarity Cushion[™] that offers multiple types of custom support. It can be used to mold around the arm and wrist as well as other extremities that require customized positioning. This cushion can also be used under the head and neck with a standard Silverman headrest, providing a long line of support that extends from the C-spine to the crown of the head.

R550-L2
40 x 60 cm

Our largest Klarity Cushion[™] adapts well in situations requiring a large support base. The cushion can be molded around the extremities, or it can be used for full-torso support or extra pelvic cushioning.

Head & Shoulder Klarity Cushions™

Comprehensive support for head, neck, and shoulder stabilization

Head & Shoulder Klarity Cushions™ are an ultra-precise method for stereotactic, cranial, C-spine, and shoulder immobilization where sub-millimeter margins are required. Head & Shoulder Klarity Cushions™ create cranial support with additional shoulder suppression. They are also available with additional fill in the neck for custom immobilization without the need for a headrest. Multiple sizes and dimensions are available for various degrees of cranial support.

Additional tools are available for easy molding, including the Shell Mold, for holding the cushion in place as it cools, and cleanable Velcro straps, offering therapists assistance in forming the cushion to the patient's contours. Once the Klarity Cushion™ cools, a thermoplastic mask can be placed on top, creating a fully encompassing, rigid support system.

R550-T
46 x 41 cm

The Head & Shoulder Klarity Cushion™ provides the same head and neck support as the standard Klarity Cushion™, but it also extends down to sit underneath the scapula and wraps up over the shoulders for custom shoulder suppression. The R550-T fits over a Silverman headrest, and for optimal reproducibility, it should be used with a Head & Shoulder Mask.

R550-T2
46 x 41 cm

With extra fill in the neck area, the R550-T2 is ideal for situations requiring customized tilt and pitch of the head and neck, or when a large amount of build-up is needed under the C-spine. The T2 is designed for use without a Silverman headrest and indexes directly to the overlay or baseplate.

R550-TL
46 x 46 cm

The R550-TL provides the same head and neck support as the R550-T, but extends further under the patient's back. This cushion sits underneath the scapula and wraps over the top of the shoulders. For optimal reproducibility, it should be used with a Head & Shoulder Mask.

R550-T2L
46 x 46 cm

The R550-T2L offers even more customized support. The cushion sits under the scapula and wraps up over the shoulders to create more fully encompassing support around the neck and shoulders. The T2L contains extra fill in the neck and indexes directly to the overlay or baseplate.

Head & Shoulder Klarity Cushions™

R550-H1
26 x 35 cm

The H1 is a fully encompassing head-only cushion that creates a shell around the head. This cushion is designed for use with a Silverman headrest, and functions best when molded with the Klarity Shell Mold. The H1 is ideal for situations that require full, 360-degree circumferential immobilization, where support is needed up to the crown of the head.

R550-HS2L
46 x 50 cm

The HS2L is Klarity's most comprehensive Klarity Cushion™. Designed for use without a Silverman headrest, this cushion indexes directly to the baseplate or overlay. The extra fill in the neck allows for custom positioning for precise tilt and pitch. The sides of the HS2L can wrap up and around the sides and crown of the head, creating a 360-degree shell around the patient. For optimal reproducibility, it should be used with a Head & Shoulder Mask.

Pediatric Klarity Cushion™

R550-P
28 x 36 cm

The R550-P is a smaller-sized Head & Shoulder Klarity Cushion™ that offers customized support and immobilization for pediatric patients. For optimal reproducibility, it should be used with a Head & Shoulder Mask.

Specialty Klarity Cushions™

Klarity Cushion™ for Leksell Gamma Knife® Icon™ System

R550-CEL
17.5 x 35 cm

Designed for Elekta's Gamma Knife® Icon™ system, the Icon Klarity Cushion™ should be used with an Icon mask to provide precise fixation and comfortable support.

Klarity Cushions™ for Proton Therapy

R550-BOS3
48 x 63 cm

The R550-BOS3 is a precise silhouette to provide comfortable, customized support for the head, neck, and C-spine. The BOS3 can be used with both Head-Only Masks and Head & Shoulder Masks.

R550-BOS
46 x 45 cm

The R550-BOS features an extended head portion to fit into the head cup, and the extra fill in the neck area allows for customized support around the C-spine. The cushion wraps up over the shoulders to provide comfortable but firm shoulder suppression. When used with a Head & Shoulder Mask, this cushion enables indexing for the whole chest and shoulder girdle.

R550-S1
10 x 16 cm

The smallest of our Klarity Cushions™, the R550-S1 provides head-cup cushioning. It can also be used in unique situations that require custom indexing.

Tools and accessories for Klarity Cushions™

R565-605C

Cleanable Strap Set

The cleanable strap set is a positioning aid that makes it easier for a single therapist to mold a Klarity Cushion™. The straps are made from a comfortable and stretchable material that is easy to clean. Velcro strips attach to the Klarity Cushion™ and sides of the couch, providing comfortable but firm suppression during setup.

Straps are used for setup only and should be removed before treatment.

Each strap comes with the following:

- Two 2 x 60 in straps
- Two 6 x 60 in straps
- Two adhesive tabs for the couch

Klarity Shell Mold (3 sizes)

- R560-S** S-type and U-frame
- R560-O** O-type
- R560-M** Klarity MultiFix™ Baseplate

The Klarity Shell Mold is a reusable frame for molding the H1 and HS2L Klarity Cushions™. Once the cushion cools within the frame, the Shell Mold should be removed before using a mask. Includes three head sizes for each frame type.

Vacuum Bags

Klarity[®] Vacuum Bags

The Klarity Vacuum Bag: a stronger, more durable vacuum bag that's fully MR Safe

Klarity Vacuum Bags are ultra-strong and durable, made of an impermeable nylon shell to help prevent punctures and tears. All vacuum bags are airtight, leak-proof, and filled with low-density mini-spheres made from polystyrene. A corner grommet allows for easy storage. All Klarity Vacuum Bags are available with or without built-in indexing bars.

Klarity Vacuum Bags are designed for long-term, multi-patient use. The nylon shell can be easily cleaned between patients. Our vacuum bags also come with replacable valves, and all bags can be equipped with valves to fit all standard vacuum pumps. Please specify valve type when requesting a quote.

R7407-30C
Vacuum Bag for Pelvic Support

KSC-3	Klarity Storage Cart, 3 Shelves		46 x 122 x 183 cm
KVM-500	Klarity Vacuum Pump with AirSwitch™		
KVP-100	Klarity AirSwitch™		

Vacuum Bag Accessories

KSC-3

Klarity Storage Cart
45.7 x 121.9 x 182.8 cm

Metal storage cart for convenient vacuum bag storage.

The cart can hold up to 227 kg (500 lbs) and comes on locking wheels. The wire shelves are adjustable (no tools required), and the cart comes with 3 shelves for customized storage. Vacuum bag grommets fit easily on movable metal rungs.

KVP-500

Klarity Vacuum Pump
Electric Vacuum/Pressure Pump,
110V dual function, oil free.
Includes AirSwitch, 2 valves, and
2 self-retracting vacuum tubes that
are 3 m (10 ft) in length.

KVP-100

Klarity AirSwitch™ handheld vacuum pump control switch

The simple, one-handed operation provides quick-change airflow with the flick of a switch. The lightweight switch has three settings—In, Hold, and Out—for precise bag adjustments. Comes with a durable two-channel hose.

The AirSwitch™ attaches to your existing vacuum pump and is available for all vacuum bag types and connector valves. Please specify current pump type when ordering.

Ovens

Klarity[®] Ovens

The Klarity AirFlow™ Oven: efficient dry-heat technology to optimize workflow and maximize safety

AirFlow™

KEL-1300

Klarity AirFlow™ Oven (110V)

Outer dimensions: 31.5w x 34.5d x 16h in (80w x 88d x 41h cm)

Inner dimensions: 25w x 19d x 10.5h in (64w x 48d x 27h cm)

Weight: 40 kg (88 lbs)

The Klarity AirFlow™ Oven is the most efficient oven available. The AirFlow™ heats to 165 °F in under ten minutes and prepares masks in 3–5 minutes. Double racks allow for multiple thermoplastic devices to be heated at the same time.

- Warms up quickly
- Nonstick surface
- Easy to clean

Klarity Ovens

Klarity ovens harness the power of dry heat to provide an efficient, easy-to-use method for preparing all standard masks, Klarity Cushions™, and other thermoplastic devices. Klarity ovens are efficient and effective. Not only do they transform therapist's workflow, but they also ensure a safer, more comfortable patient experience.

The Klarity AirFlow™ Oven is the fastest oven available today. Upon startup, the AirFlow™ automatically heats to 165°F in under ten minutes. The simple digital interface also allows the user to adjust the temperature manually. The oven's high-powered fan makes it possible to prepare masks in as little as 3–5 minutes. Klarity Cushions™ take approximately 10–12 minutes to prepare.

With its double racks, the AirFlow™ is designed to fit multiple thermoplastic devices at once, including head & shoulder masks. The racks have a nonstick Teflon coating, which means that thermoplastic devices can be placed on them directly for no-fuss preparation. The AirFlow™ is also equipped with a double-pane glass door that makes it easy to determine when devices are fully heated. When they come out of the oven, devices are completely dry and ready to be formed.

In addition to its impressive functionality, the AirFlow™ is easy to clean; the oven interior can be wiped down thoroughly in minutes. The oven does not require any auxiliary equipment, so it saves space in simulation and treatment rooms. When placed on Klarity's stainless steel AirFlow™ cart, the oven also becomes mobile.

The Klarity AirFlow™ Oven offers the best in dry-heat technology for the preparation of thermoplastics.

Klarity[®] Ovens

KEL-C100
Stainless Steel AirFlow™ Oven Cart

The Klarity Stainless Steel AirFlow™ Oven Cart is a sturdy and flexible option for oven placement. The stainless steel cart is easy to assemble, secure, and durable. It supports the Klarity AirFlow™ Oven and comes with an additional shelf for storage.

Weight: 22.6 kg (50 lbs)
Outer dimensions: 91.5w x 76d x 71h cm
(36w x 30d x 28h in)

KEL-1200RK
Supplemental Teflon-coated oven rack for Klarity AirFlow™ Ovens

KEL-113
AirFlow™ CounterMount

The AirFlow™ CounterMount is a space-saving countertop extender for the AirFlow oven. The two HDPE plastic bars attach to your existing countertop and extend off the edge to support the oven feet. The AirFlow™ CounterMount comes with a template for installation, all hardware, and two lengths of bolts for different countertop thicknesses.

Each mount is 7.6w x 66d x 2.5h cm
(3w x 26d x 1h in)

Mini

KCOQ-1750W
Klarity Mini Oven

The Klarity Mini Oven is a convenient option for head-only masks. The Mini Oven heats head-only masks, small bolus, and other thermoplastics.

Outer dimensions: 53 x 48 x 33 cm (21 x 19 x 13 in)
Inner dimensions: 38 x 30.5 x 25 cm (15 x 12 x 10 in)
Weight: 15.5 kg (34 lbs)

Working with Dry Heat

Many years ago, Klarity pioneered the use of dry-heat technology for the fabrication of customized thermoplastic devices. Today, we strongly believe it to be the best-available method for preparing all standard thermoplastic masks, Klarity Cushions™, and bolus materials (in both sheet and pellet forms). Not only are dry-heat systems extraordinarily efficient; they are also safer and more comfortable for patients. The result is a superior heating method that renders water baths obsolete.

Dry-heat technology responds to three major needs in modern radiation therapy: efficiency, safety, and comfort. Ovens perform better than water baths in all three areas. With respect to efficiency, ovens come to temperature much faster than water baths and heat thermoplastic devices rapidly. When using dry heat, thermoplastic devices can also move straight from the oven to the patient, eliminating the need to shake or towel dry them. With respect to safety, replacing hot water with dry heat reduces cross-contamination and mitigates the risk of bacterial infection. Finally, with respect to comfort, most patients find a warm, dry mask much more pleasant than a hot, wet mask.

Dry-heat ovens exceed water baths in all aspects of performance, making therapists' lives easier and ensuring patient safety and comfort.

dry-heat technology at
www.klaritymedical.com/ovenfaq

Water Baths and Bacterial Risk

In recent years, the case for dry heat has found increased support from a number of scientific studies that have determined water baths and other heating appliances to be potential reservoirs of dangerous microorganisms. As Brewer, Ravine, and Bru (2014) discuss in their 2014 article published in *Radiation Therapist*, water baths are easily contaminated by bacteria from both gloved and cleaned hands as well as by environmental microorganisms. The use of such appliances therefore increases the risk for bacterial infection, and particularly among special patient populations with impaired immunity response. Brewer, Ravine, and Bru

also found that most of the water baths used for the preparation of thermoplastic devices were not specifically designed for that purpose. For these reasons, the use of water baths requires a great deal of care on the part of the radiation therapist in order to break the chain of infection. Dry-heat technology offers a promising alternative for mitigating bacterial risk.

Brewer PS, Ravine TJ, Bru SE. Risk of patient infection from heating appliances used to produce thermoplastic immobilization devices. *Radiation Therapist*. 2014;23(2):125-35.

BiteLok®

Indexing Bars

Head Supports

Bolus

SureMark®

Steritatt

Klarity BiteLok^{®*}

- Easily breathable mouthpiece
- Indexes to mask
- Removable for easy cleaning
- Smaller profile for better patient comfort
- Optional Tongue Depressor and Tongue Diverter

The BiteLok is made of a rigid, breathable mouthpiece and indexes to the patient's mouth using fast-setting dental putty. No water or warming is needed to activate the putty. Once the BiteLok is indexed to the patient's mouth, a thermoplastic mask is placed overtop. While the mask is still warm, a hands-free Quickfit tool forms the mask around the edges of the BiteLok mouthpiece. The result is a secure, reproducible mouthpiece that indexes to both patient and mask, that can also be removed for cleaning.

The Klarity BiteLok features a smaller profile than any other mouthpiece, and the wide airway passage allows for better breathability. The BiteLok is a comfortable size for most patients, even those with smaller mouths. The BiteLok is a significant advancement in comfortable, accurate positioning for head and neck treatments.

BiteLok Kit

RNB-100 BiteLok Kit

The BiteLok Kit comes as a complete package with all tongue placement options included.

The kit contains:

- BiteLok
- Two Putty Packets
- QuickFit Tool
- Short and Long Tongue Depressors
- Right and Left Tongue Diverters
- Tongue Device Removal Tool

5 BiteLok[®] Kits/Case

QuickFit tool indexing a thermoplastic mask over the BiteLok

*US and International patents pending

BiteLok

RNB-10 BiteLok

The BiteLok can be ordered separately. The simplified BiteLok package contains:

- BiteLok
- One Putty Packets
- QuickFit Tool

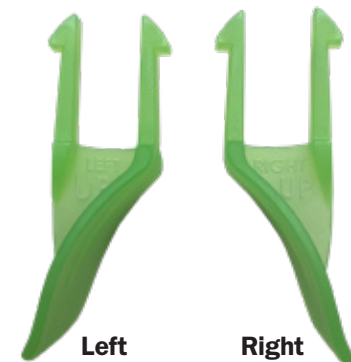

5 BiteLok Kits/Case

Tongue Placement Kit

Tongue Depressor

Tongue Diverter

Optional tongue depressors and diverters allow for additional conformability and stabilization. Once the mask has fully cured, the BiteLok can be removed from the mask by pushing the corner of the mask inward to release the mouthpiece.

RNB-11 Tongue Placement Accessory Kit

The BiteLok can be equipped with a tongue depressor or diverter for additional mouth placement options. The depressors and diverters securely snap into the BiteLok, and can be removed with a tongue device removal tool (included in the kit).

The BiteLok can be equipped with a tongue depressor or diverter for additional mouth placement options. The depressors and diverters securely snap into the BiteLok, and can be removed with a tongue device removal tool (included in the kit).

Sheets and Bolus

Klarity® Thermoplastic Sheets

Klarity low-temperature thermoplastic material is designed specifically for radiation therapy. It softens in a water bath or in a dry-heat oven and molds quickly to facilitate treatment. It provides sufficient setup time for the therapist, and simply reheating the thermoplastic will allow for any necessary modifications.

Klarity® EZ Bolus™ Thermoplastic Bolus in pellets and sheets

Available in pellet form and sheets, EZ Bolus™ is designed as an aid for skin sparing and treating irregular contours or locations. After heating to about 150°F (65°C), EZ Bolus is simple to manipulate and shape by hand, ideal for eliminating air gaps. Dosimetric properties are the same as conventional mask thermoplastics.

Klarity® Bolus™

Klarity Bolus™ is an improved bolus material for radiation therapy. Our filmless bolus is tissue equivalent, and sufficiently flexible to conform to the patient's surface. It has the optimal amount of stickiness.

Klarity Bolus is translucent, making it ideal for viewing the treatment area or lesions underneath. Klarity Bolus™ features a slightly tacky surface for excellent conformity. It can be cut with scissors to any desired shape and can be layered as needed to increase thickness. It is made of a silicone gel that incorporates a thin polyester mesh netting to provide dimensional stability.

Klarity Bolus™ is indicated for radiation therapy clinical treatments as a tissue equivalent aid to correct for anatomical irregularities and deliver a prescribed dose to the skin and underlying tissue. Target population is Adult, Child and Infant, and Federal (USA) law restricts this device to sale by, or on the order of a physician.

Klarity Bolus™ has been tested for tissue equivalency at 6 MV and 10 MV photon and at 6 MeV and 12 MeV electron energy levels. Further testing will be required to confirm performance with proton therapy systems. It is available in multiple thicknesses, listed below.

- Tissue Equivalent Bolus
- Density of 1.02g/cm³
- MR Safe

Head Supports

Carbon Fiber Head Support

Carbon Fiber Head Supports fit a variety of tabletop and couch types. They can be ordered individually, or as a set of six for all different heights. Carbon Fiber Head Supports index to standard silverman pins, and can be used with any baseplate that uses standard silvermans. The carbon fiber material is extra durable and lightweight.

- R507-CF** Carbon Fiber Head Support Set of 6
- R507-ACF** Carbon Fiber Head Support A
- R507-BCF** Carbon Fiber Head Support B
- R507-CCF** Carbon Fiber Head Support C
- R507-DCF** Carbon Fiber Head Support D
- R507-ECF** Carbon Fiber Head Support E
- R507-FCF** Carbon Fiber Head Support F

Silverman Head Support

Clear Silverman Head Supports fit a variety of tabletop and couch types. Silverman head supports are sold individually, or as a set of six, with six different heights for customization. MR

- R507** Silverman Head Support Set of 6
- R507-A** Silverman Head Support A
- R507-B** Silverman Head Support B
- R507-C** Silverman Head Support C
- R507-D** Silverman Head Support D
- R507-E** Silverman Head Support E
- R507-F** Silverman Head Support F

Prone Head Support

The Klarity Prone Head Support offers comfortable prone positioning by supporting the forehead, cheeks and chin, without compressing the area around the eyes, nose, and mouth. The Prone Head Support cushion is attached to an acrylic plate that indexes to standard silverman pins. It is compatible with any prone positioning baseplate that uses silverman pins for indexing.

R520 Prone Head Support

MR Head Support

MR Head Supports index to standard silverman pins. They are available individually and as a set of 6. They are fully MR Safe and made of fiberglass for increased strength and durability.
